

Lesson #4 - Work with Students

Review (Optional)

The fourth lesson in this Learning Series, Front Desk Staff, is designed to get you familiar with working with students/families after the student is enrolled. You may wish to review the article listed below before beginning.

The review article in the bullet list below will open the Help article in a new tab. When you are finished reviewing the material, close the tab and return to this page to proceed with the lesson.

- [Work with All Students](#)

Drop an Individual Student from a Class

Dropping a student from a class indicates the student is no longer attending/taking the class. A student is not considered in class on their drop date. Select a drop date after the last day the student will attend class and before the next scheduled class.

If a student has stopped attending one class to attend another class, use the [Transfer](#) link instead. If the class has ended and is completed [archive the entire class](#) (which drops enrolled students as part of the process) rather than dropping the students directly.

These practices will keep your drop history accurate and will allow you to easily differentiate between students who completed classes versus those that dropped out of the class prior to completion.

To accommodate different workflows, a student drop can be completed using the **Drop** link located:

- In the *Class* record > *Enroll List* tab
- In the *Student* record > *Summary* or *Classes* tab
- In the *Family* record > *Classes* tab

Drop a Student from a Class

The process to drop the student is the same regardless of where it is initiated. To illustrate the process, we'll work from the Class record.

1. Select the **Enroll List** tab in the *Class* record.
2. Click the **Drop** link for the student being dropped from the class.

Transfer a Student to Another Class

When a student leaves one class to attend another (especially within the same session), **Transfer** the student to another class. When you transfer a student, they are dropped from their current class and enrolled into the new class on the dates you assign. Both the primary instructor for the class the student is transferring into and the primary instructor the student is transferring from will receive email notification of the change.

Any scheduled future drops for the student are automatically added to the new class.

Do You Track ABSENCES or ATTENDANCE?

An organization can track absences or attendance, but not both at the same time. Jackrabbit defaults to tracking absences rather than attendance (except the Dojo edition). **The preferred method is through the Staff Portal.** Please refer to the Coaches/Instructors and other Staff category for more information. You may also record absences/attendance on the Class Record, Family Record, and Student Record.
