

Lesson #9 - Parent (Customer) Portal - The Basics

The Parent Portal - An Overview

The Jackrabbit Parent Portal is a wonderful tool that allows you existing customers to manage their account with you online, at any time of day! You control what features are available inside your Portal.

Add a link to your Parent Portal on your website, share it on Facebook, or send the link out to your families in an email for them to bookmark.

Depending on the [Parent Portal settings](#) you select, existing customers can:

- ★ Enroll students into classes and events
- ★ Schedule absences and makeups
- ★ Access class resources such as videos and PDFs
- ★ View the fees and payments posted to their account
- ★ Make online account payments
- ★ Update their contact information
- ★ Upload student photos
- ★ See news updates that you post
- ★ See and read past sent emails, registrations, and texts (if your organization uses texting)

Contacts with a valid email address in your main system can access the Parent Portal unless you specifically block them.

Families located in your Lead File do not have access to the Parent Portal.

To look around inside a "demo" sample portal that we have set up, go to this [Parent Portal DEMO](#) login page.

Use Login ID: mbestie@example.com

Use Password: BestTraining1

Remember, the information shown inside your own organization's Portal is controlled by YOU using the settings in your system and may be different than what our Demo portal highlights.

[Use the Parent Portal Log to View Portal Activity](#)

Found in the *Family Reports* (from the *Families* menu), the **Parent Portal Log** allows you to quickly see all activity in your Parent Portal over a specified date range.

- ★ Troubleshoot for parents who might be attempting to log in to Jackrabbit with the incorrect password.
- ★ Search for a specific activity in a parent's portal, such as updating a student's date of birth.
- ★ Monitor absences and makeups that have been scheduled by parents in their portals.

Parent Portal Information on the Contact Page

At the bottom of the *Contact* page you can view Parent Portal information including the following:

- Login ID.
- Number of times a parent logged into the portal .
- Last login date.
- You can also reset the contact's portal password using the **Reset Portal Password** button. This will generate a temporary password and immediately email it to the contact's email.
- Check boxes to allow portal access and manage absences/makeups.

Parents can reset their own passwords with the **Reset Password** link that is located on the Portal login page. Encourage them to do this so that your staff does not need to reset it.

Clear these checkboxes to block the contact from using the Parent Portal and to Manage Absences/Makeups.

Test Access to Your Parents' Portals

In order to troubleshoot for a parent who is not able to log into their Parent Portal, the first step is to test whether or not you are able to log into their portal.

You can easily gain access to a parent's portal by temporarily adding yourself as a contact to that family. You can then generate a password and log in for yourself.

1. Click **Add Contact** in the *Family* record. Add your own name and your own email address as a contact for this family account.
2. Click **Save Changes**.
3. Select the **Reset Portal Password** button.
 - o The temporary password that is generated is displayed in a screen confirmation and emailed. Copy the password.
4. Go to the **Gear** icon > **Settings** > **Parent Portal** > use the **Go to Parent Portal** link to log in using the password you copied. You will then be inside that family's portal. **Note:** Be sure you do not

agree to Policies when you are testing access to the Parent Portal.

When you are finished, remember to delete your testing contact from that family record.

If you are able to log in, but the parent cannot access their portal this way, then there is something on the parent's side that is not working.

If You Can Access Their Portal but They Can't

Ask the customer the following questions:

- Is the contact email address correct?
- Ask them to add app.jackrabbitclass.com to their list of secured sites from within their internet browser. This is typically found in the browser Tools > Internet Options > Security.
- What internet browser are they using? (It should be the most recent version of Chrome, Microsoft Edge, or Firefox. If their version is old, please ask them to update it.)

Something Else to Check

Another condition that can cause portal login errors is the manner in which your portal is connected to your website. If it is embedded, it can cause "session timed out" issues as well as many other problems.

Instead, make sure the portal is a link from your web page, not embedded directly into it. See the green box at the bottom of the [Link to Your Parent Portal](#) page for complete details.

Parent Portal Password Reset Issues

If a parent advises you that they are not receiving a password reset email, you can verify that it was sent by viewing the email history on the *Misc* tab of the *Family* record.

Click the **View Sent Emails** button and look for emails with the Type=Portal Password. These will confirm that the password resets were sent. You can even view a copy of the sent email.

Email History

i 180 days of email history is saved

Confirms the date and time that Jackrabbit sent the password reset email and which address it was sent to

Your customer portal password has been reset by an administrator.

Your Portal UserID is: hollyager41@gmail.com
 Your Portal Password is: 25h6bcxz
 (Please note that passwords are case-sensitive)

This is a temporary password. You can change it after you login.
 You may login at our [Portal Login](#)

~Help Center Parent Portal/Jackrabbit Support

Multiple Incorrect Parent Portal Password Attempts

If a parent attempts to log into their Portal using an incorrect password five times, all subsequent attempts will be blocked, even if the correct password is then used. Access to their Portal will be suspended and they will continue to receive the **Invalid user ID /password combination** error until they reset their password.

They can use the **reset your password** link in the login error window to generate a password reset email. Alternatively, you can reset it for them from their *Contact* record in the *Family* account. Click the **Reset Portal Password** link to generate a temporary password which will display briefly and also will be emailed to the parent.

Legal Policies and the Parent Portal

The Parent Portal is a great way for your customers to agree to your legal policies or renew their agreement to your current policies. With customers agreeing to policies online, you have the ability to access the last agreement date for each family, as well as a copy of the agreement with the date and time stamp. This eliminates the need to keep paper-signed agreements!

Jackrabbit captures your customer's agreement and stores it. **Note:** Registration information is stored in Jackrabbit for up to 5 years. There is a fee to retrieve records older than 5 years.

Having your customers renew their agreements at least annually and more if needed is recommended. This ensures you have current e-signatures on file to fulfill the requirements of the [Electronic Signatures in Global and National Commerce Act \(E-Sign Act\)](#) which recognizes consent in the form of digital approval.

To create or manage your policies go to the *Gear (icon) > Settings > Policies (tab)*. See our Help article [Legal Policies & Policy Groups](#) for more information.

Whenever a **NEW** customer registers online coming in via the Online Registration Form, your current legal policies are displayed at the bottom of the registration form and they **must** agree to each one by checking the boxes and typing their full name, which Jackrabbit stores in the *Family record > Policies (tab)* for easy access.
