

Enrollment Snapshot Reports

The Enrollment Snapshot 1 and 2 reports are not historical and only look at **current enrollment at the time the report is generated**. Each creates, in different formats, a snapshot of the current enrollment and includes current revenue (current size x tuition fee) vs. the maximum revenue (max size x tuition fee).

This report is intended to be a quick "snapshot" of your enrollment multiplied by the tuition fee. Any discounts, prorating, fixed fees, etc. are not included in the calculations of this report.

For a detailed look at class or event revenue, we recommend using the [Class/Event Revenue Summary Report](#).

Transfers that have taken place within the selected date range can inflate the enrollment number as it will show as enrollment on the initial class and the transferred class.
